BOY DYING, MAN HURT AS HUB TRAIN SMASHES AUTO

Remus' First Wife Backs Him

'Unwritten Law' Defense

Daughter Loyal to 'Ex-Rum King'

International Newsphoto

HIS FIRST SPOUSE

Mrs. Lillian Remus Krauss, first wife of the "King of the Bootleggers" justifies his slaying of his second wife. She avers he was driven to it by his second wife's conduct. The slain woman is said to have stolen Remus from her.

AS A YOUNG LAWYER

This photo shows George Remus as he appeared when a young lawyer, winning his cases by resourceful labors and ingenious interpretations of the law. He then loomed as the "King of the Bootleggers" and finally served a term at Atlanta. (Story on Page 1.)

HE KILLED HER

Mrs. Imogene Holmes Remus was shot dead in a Cincinnati street on her way to obtain a divorce from the husband she won from his first wife by her charm and beauty. Remus overtook her taxicab and shot her fatally after she left the cab.

SAYS SLAYING WAS JUSTIFIED

This photo shows Remus pleading in court before he became the country's "Rum King." His defense will be the "unwritten law" and he names the man on whom he charges his wife spent his fortune. Remus claims all his millions are gone and he charges his wife took a big share of his fortune while he was in the penitentiary.

BROODS

It is a u s' d a u g h t e r. Romola, is loyal to her father. She visits jail.

MAYBE WINTER'S HERE

ALL TINGLY, BUT, OH, SO NICE!

The first touch of Winter found Grace Merrill of Dorchester and Betty Anderson of Brookline out for a walk. There was a zippy zest to the air that sent the blood tingling through one's veins and gave cheeks the flaming tints of Autumn and eyes the sparkle of sunshine.

BEACH, WIDOW REFUSED BAIL

Mrs. Margaret T. Lillendahl and her alleged secret lover, Willis Beach today pleaded not guilty to a joint indictment charging them with the murder of the woman's husband, Dr. A. William Lillendahl, and were denied release on bail. Their trial will not begin before November 28.

MOVIE THEATRE BOMBED

Second time in strike Minneapolis, Oct. 10 (U.S.A.)—The Loew picture theatre, North Minneapolis, was partly wrecked by a bomb today. This is the second bombing of moving picture houses since the strike of motion picture operators, stage hands, scenic artists, bill posters and musicians began here a month ago.

HUB TRAIN HITS AUTO; BOY IS DYING

Topfield, Oct. 10—A boy was probably fatally injured and a man was severely hurt today when a Boston-bound train from Newburyport crashed into a coupe on a turnpike grade crossing near the Topfield fair grounds.

The injured: George Booth, 15, of Turner Hill Farm, Ipswich, fractured skull and other injuries, Beverly Hospital. Samuel B. Clark, 45, Turner Hill Farm, severe bruises and lacerations of entire body.

The only guard at the crossing is a signal post with automatic warning arm and light. The automobile was hurled against this post and wrapped around it. State Police Officer A. L. Murphy dragged the injured pair from the wreckage and rushed them to the hospital in a commandeered automobile.

POST \$5000 FOR LOST TEACHER

A reward of \$5,000 was offered today for the safe return of Miss Jeanie E. McClure, Corning, N. Y., school teacher, and Boston police were notified that she was reported being in Boston within the past few days.

Miss McClure, who last twenty-one years old and very pretty, disappeared while on her way home from United with her mother and brother on August 31 of this year and detectives have been seeking her ever since.

The search has centered in the Hub at least once before, but no trace was found and no demand for a ransom ever came from her supposed kidnappers.

The reward is offered by the citizens committee of Corning. It will be paid, according to the announcement, for the girl's safe return or information adding in bringing about her safe return.

She is five feet four inches tall, weighs 125 pounds and has blonde, unobbed hair. When she dropped from sight in Manhattan, N. Y., she was wearing a black felt tight-fitting hat with a red and white striped green silk crepe dress, trimmed with dark blue quarter topstitch, and a wrist watch and necklace of pearl beads.

BOSTON AMERICAN

BOSTON, MONDAY, OCTOBER 10, 1927

'HE WANTED ME QUICK'

LIFT 5-DAY LAW SO SHE CAN'T CHANGE

Rather than risk the possibility of pretty Doreen Kane, 19, of Mansfield, changing her mind, Attorney Clarence A. Barnes of Boston got the five-day law waived and the couple were married today. He is 45, and was a widower with three sons.

FRENCH FLIERS HOP OFF FOR SO. AMERICA

La Bourget, France, Oct. 10 (A.P.)—A French biplane, piloted by two men, took off today for the south Atlantic, bound for the Argentine capital, with one more hop, at its destination.

"Nungesser-Coll" to the south today, with Alcock as their pilot. They took off at 4:45 a.m., heading to make St. Louis, Senegal, 2,700 miles away, on the first hop, then across the South Atlantic to Natal on the Brazilian coast, and proceed to the Argentine capital, with one more hop, at its destination.

TRUCK CRUSHES OUT BOY'S LIFE IN SOMERVILLE

Crushed under the wheels of a hauling truck, four-year-old Warren Cunningham, son of Mr. and Mrs. Eugene H. Cunningham of No. 5 London street, Somerville, was fatally injured today near his home, dying on the way to a hospital.

Joseph J. O'Brien of Tudor street, South Boston, driver of the truck, was arrested on the technical charge of operating a vehicle so as to endanger the lives and safety of the public.

O'Brien was backing from Lincoln street into London street, according to the police. He felt the right rear wheel passed something and, investigating, found the crushed body of the boy.

LAY REVERE FIRE TO CIGARETTE

A cigarette, carelessly cast aside by a dancer, is believed responsible for the fire that gutted the National Gardens and the Pitt at Revere Beach, threatened the entire amusement, closed for several hours, and brought fire apparatus and men from six cities.

A general alarm was sounded belating fire fighters from Revere, Chelsea, Lynn, Boston Everett and Winthrop. Though the flames were mainly confined to the one large building destroyed, the firemen had a long, hard time in keeping them there. The estimated loss is \$300,000 of which about \$150,000 is covered by insurance.

Flames shooting across Bowler street endangered the building housing the \$200,000 educational exhibit of electrically operated wood carvings, known as the Pavin exhibit, and also the Derby Race. Several times roofs of buildings housing the "Palace of Women," the State ballroom and the Hay Day merry-go-round caught fire.

At last he came to his 9th inning. There were 2 strikes called and no balls—his friends stood around and tried to forget. He was a fan.

Lay 760 Eggs a Second

Washington, Oct. 10—American hens lay 760 eggs a second, Government sharp has figured that out. It is the most quantity of the source of one-third of the world's supply.

BY AIR LINE TO CHICAGO

BACK TO HUB SAME DAY

Mary and Peggy Corbett, Somerville sisters, boarding a Stinson-Detroit air at the Boston airport early today for their flight to Chicago. They will fly back to Boston in time to dance at the opening tonight of Club Chateau, Boston's new night club, at No. 353 Huntington avenue.

FABLES IN SLANG

THE FABLE OF THE BASEBALL FAN WHO TOOK THE ONLY KNOWN CURE

ONCE UPON A TIME A BASEBALL FAN LAY ON HIS DEATH-BED. HE HAD BEEN A ROOTER SINCE THE DAYS OF UNDERHAND PITCHING—

FOR MANY SUMMERS HE HAD COME HOME ONE EVENING AFTER ANOTHER WITH HIS COLLAR MELTED AND TOLD HIS WIFE ALL ABOUT THE GAME.

OF COURSE SHE NEVER KNEW WHAT HE WAS TALKING ABOUT. BUT SHE PUT UP WITH IT YEAR AFTER YEAR.

AT LAST HE CAME TO HIS 9th INNING. THERE WERE 2 STRIKES CALLED AND NO BALLS—HIS FRIENDS STOOD AROUND AND TRIED TO FORGET. HE WAS A FAN.

HIS WIFE PLEADED FOR ONE MORE BALL. SHE MOVED—SHE LEANED OVER AND LISTENED. HE WANTED TO KNOW IF THERE WAS ANYTHING IN THE MORNING PAPERS ABOUT THE CONDITION OF BABE RUTH'S KNEE.

MORAL: THERE IS A SPECIFIC BACILLUS FOR EVERY CLASSIFIED DISEASE.

By GEORGE ADE

WARM WAVE TO FOLLOW FROST

The first cold chin of the season, which reduced the mercury here last night to 45 above and nipped northern New England with a frost, is actually predicted to surrender tomorrow to an incoming wave of comparative warmth.

Before reaching its early Autumn chill, however, the chilly visitor will punch the interior of the State with a last frost tonight and moderate the unpop of furnace fires in Greater Boston until morning at best.

All morning marks east of the Mississippi River today were below 40 on the thermometer, and the cold and the Rockies. Temperatures were rising as warm weather gathered forces for a march to the Atlantic coast.

Forecast for Boston and vicinity: Fair tonight and Thursday; clear temperature Tuesday; moderate west and northwest winds.

Moore and His Wife Play Married Roles

By LOUELLA G. PARSONS,
Motion Picture Editor of Universal
Service.

Los Angeles, Oct. 10.
WEN MOORE plays the hus-
band of Kathryn Perry in a
Warner Brothers picture, with the
title of "In Name Only."

That shouldn't be a very difficult
performance for either of them, for
Miss Perry, who was a former Fox
star beauty, has been Mrs. Moore for
the past five years, the second time
she has been married.

Edwin Justin Moore, who au-
thored "In Name Only," is back from
New York, where he sold "Children
of Darkness" to the Theatre Guild.

He is particularly pleased that Leta
Fontaine and Alfred Lunt will bring
his play to the stage. Mr. Moore,
who was a movie press agent and is
now a movie producer, has a
dramatic background.

"The Playwright" and made a name
for himself. He also worked on a
musical comedy, based on "Tip Van
Winkle," for Sam Harris.

Someone says Cecil DeMille and
tell him to hurry with his movies.
He is about to film Washington Irving's
famous story and it would be
a pity if the screen play were pro-
duced before the movie made its
debut. We couldn't bear that in Hal-
lowe'en.

Conscience Rewarded

Did I say Joseph Schenck would
return to Hollywood in three or four
weeks? My error. Joseph Schenck
has gone abroad to attend five or six
weeks in Europe. Before he sailed
he integrated John Considine, making
him general manager of United
Artists.

I don't know exactly what that
means—whether he runs the show or
whether Mike Layne is boss. What
matters is, in the long run, that
the pictures are made. Mr. Con-
sidine's appointment came as a birth-
day present and followed an offer he
had from twenty Yale men to join
his company.

Sometimes it takes an offer from
the outside in the film business to
get the recognition one seeks.

For Mr. Considine needn't worry
about selling his English plays and
climax, unless he has really set his
heart on putting over a deal. He
has a job all ready and waiting for
him as soon as he reaches Holly-
wood.

He plays the male lead in "Fruits
of Divorce," a new picture to be

produced by the Gotham Pro-
ductions, under the direction of R. Wal-
ter Noll. I don't know whether
Miss Moore is the owner of the vic-
tim, but she plays the feminine lead
in this divorce drama.

Leads In New Film

With this title, we may be hav-
ing some propaganda. One never
knows in the movies when that hap-
pens.

Hearing that "Abe of the U. S. A.,"
a play by Arthur Gurney, had
been purchased by the same Gotham
production company, I wonder if
Miss Moore will file suit.

She has been greatly agitated. I
am told, every time a Jewish-Irish
story has made its appearance on
the screen. She has nothing on me,
for I have seen so many of them it
would suit me if a Jew were placed
in every picture of this type.

Anyhow, it may be that Mrs. Nich-
ols, who wrote the famous "Abe's
Irish Boss," may object to another
new Abe. I wonder?

ARMY CAPTAIN, WIFE, 3 CHILDREN FLEE BLAZE

Two families were driven out to-
day when fire of undetermined origin
broke out in the second floor apart-
ment occupied by Captain Roy L.
Bowling, of the Army Base, at No. 58
Katherine road, Watertown.

Captain Bowling and his wife were
awakened by smoke. The blaze
started near the fireplace. Smoke
and fire extinguisher. Captain
Bowling attacked the flames, while
Mrs. Bowling carried to safety two
of their three children, Roy, 4, and
Charles, 3, returning for the baby,
Robert, one month old, she was as-
sisted by police and firemen.

In the meantime, owners of the
house, Mr. and Mrs. E. L. Rogers,
who occupied the ground floor, had
been scarcely alerted. The blaze was
confined to the partitions, with dam-
age estimated at \$1,200.

Duchess Expects Stork

London, Oct. 10. (N.S.)—The
Duchess of York, wife of the second
son of King George and Queen Mary,
is expecting the second visit from
the stork in November.

One Boy-power—

Just how much
is it?

What Leading Teachers of Domestic Science say about WHITE ROSE BREAD

"The texture is very fine...not coarse
...more like cake texture."

"It retains its moisture in a manner
truly unusual. There is an absence of
'sogginess.'"

"It more nearly approaches home-
made bread than any loaf with which
we compared it."

"I believe this to be the perfect loaf
of baker's white bread."

need, the extra energy childhood demands.

Into every loaf of White Rose Bread goes,
for instance, almost twice as much milk as
many recipes call for—the finest flour and
shortening that can be bought—sugar of
the exact quality you use for table service.

Try White Rose Bread today. Notice
the difference yourself. Notice its fine,
even grain—the way it slices wafer-thin
without crumbling—the evenness with which
it toasts.

You'll find White Rose
Bread not only more nourish-
ing but more appetizing as
well. Serve it to your family
and see how quickly they too
will notice the difference!

different from any other loaf you can buy.
It has been made especially nourishing—
richer in the very elements growing bodies

ALIVELY bundle of energy. Mothers
know that every boy is that! But
scientists have measured the actual
amount of energy he uses in the daily busi-
ness of living and growing.

For every pound your boy weighs, he uses
up every day almost twice as much energy as
his father!

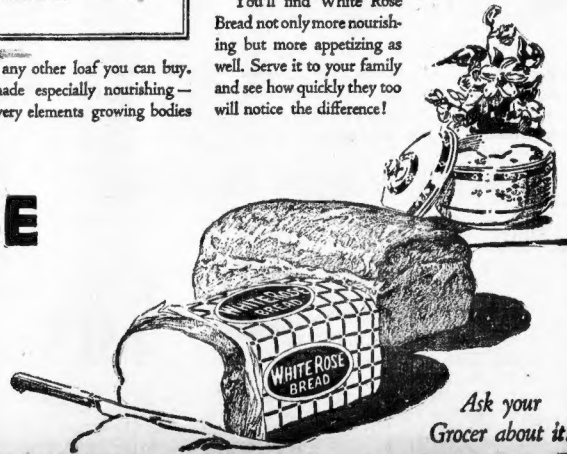

"One boy-power!"... And when you
realize that one-fourth of that energy comes
from bread alone, the selection of the bread
you serve becomes of major importance.

Prominent food authorities helped to per-
fect White Rose Bread—a new loaf for
mothers who want to give their children the
best that can be baked.

That is why White Rose Bread is

DOG PROVES HIS MENTALITY IN COLLEGE QUIZ

New York, Oct. 10 (N.Y.)—The mental processes of a police dog, "Fellow," believed by his master to have the intelligence of an 8-year-old child, were proved today in an animal psychology at Columbia University today.

Tests were made under supervision of Professor C. J. Warden in charge of the animal psychology laboratory, and were made by the dog's master, Jacob Herbert of Detroit. In the minds of the professor and the psychology students the tests were successful.

While the students sat, Herbert made the animal walk here and there at command, pick up articles and place them at any designated spot. Then Herbert hid behind a screen and spoke his orders unobscured by the animal. Again the dog responded with unflinching precision.

"Psychologically," declared Professor Warden, "we cannot compare the dog to a child. We do not know what makes it do things, but we know that 'Fellow' does not depend

Flowers Cast on Sea in Memory of 80 Lost Fishermen

Lanterns, N. B., Oct. 10 (A.P.)—Flowers and wreaths were trundled down to the sea in wheelbarrows and cast upon the outgoing tide today in tribute to the memory of fishermen who lost their lives at sea during the last year.

Thousands gathered on the shore for the service. Today's list of dead was the largest since the annual custom was adopted. Eighty men, the crews of four schooners, were lost in one catastrophe in the storm of August 21.

Federal and Provincial authorities joined with churches of all sects in the tribute. From the helms of the Canadian government steamers Argo, masted choir sang the hymn, "Safe in the Arms of Jesus," and a salute was fired from the ship.

upon gestures or a mere learning of routine motions.

"In some manner he has learned to associate concrete objects with certain phonetic sounds."

To prove the professor's conclusion, Herbert jumbled his commands, accepted suggestions from the class and proved conclusively that he had not taught his dog routine performance.

To demonstrate the accuracy of the animal's perception, he told it to pick up a collar, place it on a table and then do the same thing with a dollar. The phonetic difference between these two words is very little, yet "Fellow" found little difficulty in choosing the right object.

Herbert hopes to demonstrate his dog's ability in high schools and colleges throughout the country.

3 ARRESTED IN BOSTON 'DOPE' RING RAID

An alleged city-wide drug ring that has hidden itself, according to Federal narcotic agents, behind control fronts in the Rock Bay and Dorchester was exposed today by three arrests and the expectation of a fourth.

John J. Gouner, James Tucker and Manuel Abrahamson will be arraigned before U. S. Commissioner E. C. Connelley on drug charges following investigation of alleged narcotic traffic.

Headquarters of the supposed ring, according to Federal agents, were located at 100 Huntington Avenue and near the corner of Franklin Park.

The raiders, according to Allen, were in a fair way to smash a small fortune when their activities were tipped by the arrests. "Dope," he said, was sold to his agents at \$45 an ounce.

One of the suspects, Allen declared, lived with his wife in a luxurious suite in Columbia Road; another in a lavish apartment in Galton Street.

Allen declared an approach by one of his men to make a purchase was always met with the request that he must another man and this introduction led to several runs before the "dope" was secured.

POLICEMAN HURT TRYING TO STOP RUNAWAY HORSE

A horse frightened by a steam roller or pulled in Arlington Center today, and the driver, a policeman, an automobile, the wagon and half a hundred empty barrels were numbered among the casualties.

Traffic Officer Arthur J. Keener, who grasped the bridle at Massachusetts Avenue and Pleasant Street, suffered a fractured finger and severe body lacerations before he got to. He was taken to St. James Hospital.

The driver, Edward D. Shaw of Clark Street, Somerville, fell into the street and was bruised. The wagon lurched into a sedan and smashed it, and finally, the wagon tipped over, scattering empty barrels over the street. The horse was stopped by a citizen.

HOME AFIRE AS EDITOR WRITES ON 'PREVENTION'

St. Albans, Vt., Oct. 10 (A.P.)—Just as Milton B. Vail, editor of the St. Albans Messenger, was putting the fire prevention week, local fire apparatus was called to his home today to extinguish a blinding match. An arson as the fire was extinguished the editorial was completed with some revisions.

JOHN D. JR., GIVES U. OF C. \$1,750,000

Berkeley, Cal., Oct. 10 (U. S. B.)—President W. W. Campbell of the University of California today announced that John D. Rockefeller, Jr., had made a gift of \$1,750,000 to the university for the erection of a social center and residence building.

REV. DR. PIERCE WITH CARDINAL IN HYMN BAN

President Coolidge's pastor, Dr. Jason Noble Pierce, today took occasion in the condemnation of the hymn, "Heavenly Love of Southerners," which Cardinal O'Connell denounced and barred from Catholic funerals.

"So far as I am personally concerned, I am in sympathy with the Cardinal's position," said Dr. Pierce, who is pastor of the First Congregational Church in Washington, where he was interviewed.

"The hymn is vague and sentimental. However, the Congregational Church stands for freedom in such matters, and if my people want to sing it, it is all right for them to do so."

Dr. Pierce is a member of the Monday Club of Boston and held a number of New England pulpits before going to Washington.

Another Washington pastor, Rev. W. R. Abernethy, Baptist, also expressed disapproval of the hymn.

"The hymn is all right, but there are other hymns on which I place a higher valuation. It is vulgar in definite, you know—beautiful love of Southerners. I have never been very fond of it."

Heaven No Place for Those Who Can't Sing, Declares Bishop

Chicago, Oct. 10 (A.P.)—Bishop Edwin Hall Hughes of the Methodist Episcopal Church believes that any man who gets in heaven without being able to sing is going to have a hard time of it.

Addressing the Rock River conference of the church, Bishop Hughes said:

"If you don't cultivate a taste for music, you will have a miserable time for about 1,000 years after you get to heaven."

Ragtime and jazz, he said, "have had their day."

W. R. Abernethy, Baptist, also expressed disapproval of the hymn.

"The hymn is all right, but there are other hymns on which I place a higher valuation. It is vulgar in definite, you know—beautiful love of Southerners. I have never been very fond of it."

NEW FORD TO DO MILE A MINUTE ON LITTLE GAS

averages could be from 25 to 30 miles.

The car, however, will be guaranteed to operate at a sustained speed in 10 minutes an hour. It was claimed. The remainder of the duration of the new car, carried in 10 minutes advertisements, it was said, was approximately correct. The car would have a standard-type motor, with 34-horsepower, three forward speeds and a wheelbase of 104 inches.

17-GUN SALUTE FOR BRITISH ADMIRAL

A salute of seventeen guns, an-
nounced from the U. S. S. S.
Secretary at the Navy Yard in Wel-
come to Admiral Sir Walter Coward
and the British cruisers Calcutta
and Chichester.

Sir Walter, who is a full admiral
and commander-in-chief of the
American and West Indian stations
of His Majesty's Navy, with head-
quarters at Bermuda, will be here
four days during which time he will
be aided by Major-General Preston
Brown and the Boston Chamber of
Commerce.

Tying up at Pier 2 at the Yard,
the cruisers were within a few
yards of the stern of the famous
old frigate, Constitution, "Old Iron-
sides," which once raised havoc
with English warships of a more
ancient vintage.

Following a visit of welcome by
their Admiral Philip Andrews and
Charles J. D. Wilson, William L.
Littlefield and H. D. Cook, the Brit-
ish commander returned the mili-
tary honors from the Navy
Yard and Marine as he stepped aboard.

BETTY ALDEN'S SOCIETY COMMENT

Junior Division of the S. P. C. C. Plan
Cinema Show in Symphony Hall to
Raise Funds for Their Pet Charity

BOSTON'S BEAU MONDE IS DOING ITS
philanthropies in the grand manner this
season. It makes of the affair a gala occasion. Dresses
for it elaborately, entertainers for it sumptuously
with dinners beforehand and then takes its guests
"on," quite a la grand opera. Such is the method
by which the Junior division of the S. P. C. C. raises
a new way to acquiring the very necessary funds
with which its Fall and Winter campaign must
be fortified to be highly successful. Junior division
members are already imputing the dash of their
originality on an affair set for midwinter in Sym-
phony Hall. They make their benefit a cinema show
with an up-to-the-minute film and, as the
division has the active support and backing of a
most important section of society, it is safe to pre-
dict great financial rewards aside from an amusing
evening. Mrs. Joseph Seabury is the division's leader
this year and a good deal of the upper crust set
is working with her.

THE EFFECTIVENESS OF A BRIDAL COMPANY
fronched and hatted in the same color was most
salutarily emphasized by the group of girls Mrs. O.
Herbert Sherbrooke surrounded herself with on her
wedding pilgrimage. Autumn's sumptuousness of
sheen and color was in the attendant's frocks and
hair, all done in "honey" tinted velvet, the trans-
parent sort that ripples lightly as chiffon and has
the deep blue of larkspur. Mrs. Sherbrooke was a
revelingly pretty bride as she walked up the taper
littered aisle. Her gown was of new airy fairy trans-
parent velvet, a warm ivory tone to harmonize with
the lovely old point lace collar her veil and rippling
from the ash of a bouquet that varied the bridal
white with clustered orchids. A bit of priceless lace
rose faintly over her collar and held the length
of veil that reached to the rounded end of a court
train.

MRS. EARL CONWAY (MOTHER OF THE
bride) who in Trinity Church's register has
signed herself "Virginia Conway" for
was handily turned out. She wore a Paris
costume of velvet and metal tissues as the
Autumn mode decrees their usage. Miss Janet
Conway, a sister of the bride, was the maid of
honor and her costume was at all from
those of the bridal troupe except
that her chapeau was of the class
thing variety, while all the others
were wide and a bit drooping.

EVERY ONE OUT IN THE
Norfolk hunting set will be

(Hachrach Photo)

BETTY MOULTON
Boston and North Shore society girl
helped her mother entertain at a recent
house party given to the Myopia Hunt
set. Miss Moulton is prominently iden-
tified with the younger set.

keeping open house over the com-
ing weekend in celebration of the
Norfolk Hunt's big day, its in-
augural race meet on Saturday.
Mr. and Mrs. Augustus F. Goodwin
are to be house guests of the Wal-
ter Channing at Dover. Both Mr.
Channing and Mr. Goodwin are
well known officials in the season
set, of course, the second as a
paddock steward.

FOR THE MOULTON PARTY
at the Myopia Hunt, Mrs.
Goodwin's daughter, Miss Betty
Barrell, was radiant in a sparkling
gown of silver with a train of jade
shades verging on the red with a
touch of rust brown in its folds.
Mrs. John B. Moulton, hostess for
the occasion, was in black velvet
with silver, and Miss Betty Moul-
ton wore a shimmering frock of sea
green in contrast to her eyes, that
are deep sea blue. The Moulton
party combined thus early in the sea-
son sets a fine high pace of gaiety
for others to match up to.

SPEAKING OF MYOPIA,
Philip Shepton filed that
pleasant clubhouse an excellent
place in which to collect his busi-
ness conferees for a luncheon and
dinner. The day before his hotel-
day is devoted to his business car-
ried on and much informal, most
pleasant surroundings, as the club
affords to its members and their
friends. The Sheptons have some
young people who are becoming
most prominent in the social and
appear early of mornings when the
Myopia Hunt is afield. After the
wily and elusive fox, the set
so elusive annals seed bag.

Betty Alden

**START \$1,000.00 DRIVE
FOR WOMEN'S HOSPITAL**

The Free Hospital for Women,
second oldest institution of its kind
in the United States, tonight will
launch its semi-annual fund-
raising campaign for \$1,000,000.

George R. Frazier, campaign
chairman, and Frederick P.
Hovey, chairman of the special
appeal committee, will meet mem-
bers of that committee for din-
ner at the Augusta Club, the
organization's headquarters.

One hundred prominent men
and women, representing a
variety of professions, business,
and professional interests of Greater
Boston, are serving as members of
the committee. Mrs. Louis A. Frothingham heads the women's division.
Miss Ruth Thayer is vice-chairman
of the entire campaign.

**TWO MEN INJURED AS
HUB ELEVATOR FALLS**

Victim B. Hunkley, 61, of Cambridge street, Brighton, member of
the Boston Fire Department, and
Orlando T. Floyd, 45, of Nassau
avenue, Medford, were injured today
when an elevator dropped in the
building at No. 114 Broadway, South
End. The men were riding on the
elevator when the cable parted while
the was between the first and
second floors. Hunkley suffered a
broken leg and Floyd a fractured
shoulder. They were taken to the
City Hospital.

MEXICO REBELS MARCHING ON NUEVO LAREDO HUB SHIP RACES DEATH TO PORT WITH VETS

Nuevo Laredo, Ariz., Oct. 10 (U.S.N.)—
Two thousand Yaqui Indians were
seen throughout Sonora, headed
for the Mexican revolution today,
with the events following the
killing of Alamo de la Huerta, rebel
leader, tentatively obscuring the fu-
ture also of Mexican Federal forces.
It is said the Yaguis are emboldened
by moves to deprive them of their
lands, home and cattle.

Nuevo Laredo, Mexico, Oct. 10
(U.S.N.)—This important rail centre
on the Rio Grande today became the
new vortex in the military activities
of the new political revolution in
Mexico.

Three separate columns of rebel
troops, said to have been recruited
on the American side, are planning
to attack this city within 48 hours,
according to word received by the
Mexican Consul at Laredo, Tex.

General Enrique Dorantes, staunch
Cubans supported took over command
of the Federal garrison here, sending
the General Gonzales, an anti-Calles
sympathizer.

In possession of Nuevo Laredo the
revolutionists would be in control of
the most important point of entry
from the United States, thus cutting
off needed supplies for the interior.
General Dorantes attended a meet-
ing of the revolutionists today at
Laredo, Tex., and it is said will lead
one of the columns against Nuevo
Laredo. Three bands of arms and
munitions were reported to have been
sent to the border from San Antonio.

**MISS VANZETTI IS HOME
WITH BROTHER'S ASHES**

Thirte, Italy, Oct. 10 (U.S.N.)—
Miss Lavinia Vanzetti, sister of five-
year-old Vanzetti, who was executed
in Boston with Nicola, her husband,
arrived home today after leaving her
brother's ashes with the frontier and
buried them. The official promised to
forward the urn to the village of
Villafraia, where they will be
buried. Miss Vanzetti said she was
glad to be home and immediately to
prepare for the funeral.

WHEAT CEREAL MAKES A BREAKFAST GOOD

Start the New Day Right

THERE seems to be a new slogan among doctors and dietitians: "Start the day right with breakfast."

Breakfast might really be called the great American farce. No meal is so neglected, so misused and so much more important, according to diet specialists.

In the morning every one needs a hot nourishing breakfast to get into action for the day, just as a cold motor needs priming. The body's chief need at the start of the day is energy. Breakfast should supply this need fully and enjoyably.

There is one delicious food which perfectly meets this morning requirement—whole wheat cereal. Physicians and dietitians know whole wheat cereal is a valuable carbohydrate food, especially rich in energy, substance and the vitamins we all need.

It is a doubly valuable food because it is in such simple form that the most delicate digestion can handle it easily and quickly, without extra effort.

As one of the first solid foods for babies, strained whole wheat cereal has had a leading place on physicians' diet lists for many years. And for growing children its rich store of energy fills an especially vital need.

An energizing breakfast! Tempting, satisfying, affording every enjoyment—have it tomorrow morning. It will assure an active, alert, happy supply for children and grown-ups alike.

And with this whole wheat cereal you can put the margin of variety in this monotonous meal, for you can serve it in so many tempting ways. Try whole wheat cereal cooked with prunes, raisins or served with baked apples. Children love it with brown sugar or maple syrup.

The leftovers can be poured into a buttered mold, sliced when cold, dipped in flour and fried in butter. To be served with maple syrup for a luncheon or supper dish. Brown bread, is especially delicious and wholesome baked instead of steamed and a recipe which makes a cupful of this valuable whole wheat cereal. You'll find the leaves and recipe illustrated at the top of this page.

DO try it and if there is any left over—which I doubt—serve it in a bowl and eat it in butter for Sunday morning breakfast.

BAKED WHOLE WHEAT CEREAL—1 cup whole wheat cereal, 1 cup whole wheat flour, 2 tablespoons sugar, 1/2 teaspoon salt, 2 tablespoons milk powder, 1 cup molasses, 1/2 teaspoon soda, 1/4 cup milk, 1/4 cup raisins. Mix all dry ingredients except soda. Add raisins. Add to the mixture, hold the cup over the mixing bowl and beat in the soda until foamy, then add to mix. Add milk. Bake in moderate oven (350 F.) for forty-five minutes in greased powder cans filled two-thirds full.

Good food values in and around Boston

A SHINY FIND

THERE'S A SHINE in every drop of a certain liquid stove polish. Brilliant, safe, dustless, quick. Keeps stove bright with least effort. The choice of the particular housewife.

DOCTORS SAY that cranberries aid digestion. Contain mineral salts—necessary to a balanced diet. Would you like new recipe book? For pies, puddings, cakes, salads, relishes, sauces and jellies—learn from cranberries. Easy to make and tempting to the eyes and appetite.

SPECIALLY PRICED for housewives, nurses, waitresses, hair-dressers, manicurists are flower dresses of extra fine quality Indian Head, \$2.45. Popular long sleeve style. Generous pockets and belt in back. \$4 to 46.

DAINTY AND SERVICEABLE is a beautifully engraved solid brass butter dish. With clear cut glass insert dish and beautifully engraved cover. Diameter of fluted brass tray 7 1/2 inches. Just \$1.00, \$1.25 by mail. Does away with messy butter plates.

SMACKING GOOD are fresh tomato sausages. Of reliable make. Tasty, different. 20c a pound. Of the same choice materials you'll find in your own kitchen.

FROM CALIFORNIA comes a brand new honey. Has an orange blossom flavor that's exquisite. The jars are unusual, too—an imitation crown. 75c — and you'll come back for another.

YOUR TEETH JOURNEY far before they find the pit of a certain brand of olives. Extra large and plump. Truly superb. Particular people a thousand miles away order them from this Big Boston store.

IMPORTED FROM HOLLAND—and mighty good are crisp pencil-like crackers. Delicately flavored and filled with a smooth, mocha cream. New. "Different."

THOSE ALMOST FORGOTTEN luxuries—branded fruits—are once more on the market. Branded peaches, figs, pears, mixed fruit, cherries or pineapple.

MAY I SEND you further information on the where and how much of one of all these items? Just enclose label to 2c stamp with your full name and address, and send me in care of Boston American, 5 Winthrop Square.

Faithfully yours,

Martha Lee

Care in Fish Cooking

LUNCHING is a popular sea grill. It occurred to me that many people seem eager and willing to consume fish in hotels and restaurants but cannot be hired to eat it at home.

The reason, I feel sure, is the difference in the method of cooking, for certainly the fish we get on our tables in these resort cities is the same as that served in the restaurants. This supplies certain definite needs of the body, and instinctively we eat it when we feel the need for it. But it must be properly cooked and attractively served to be appealing.

The important thing when buying fish is its freshness. Really fresh fish should be round and plump near the tail, with scales slightly undulating as though ribbed, and if poked with the finger it will show no dent.

The important thing in the proper preparation of fish is the method of cooking. Pups you have in mind the platter of dejected looking slabs of fish with curled up edges that are too, too brown, with perhaps little pieces of burned skin sticking around all over the piece, the whole surrounded by a sad odor of scorched fat.

The old-fashioned way of frying fish was to put it in the frying pan with a dab of cooking fat and let it smoke and sizzle until done. To be properly fried, fish should be cooked in deep fat, just as you would cook doughnuts or fritters. This prevents sticking to the pan, and makes a lovely brown, non-toxic crust which makes the epicure's mouth water with anticipation.

To make a truly delectable dish, add oil to your family cut for frying, use the following recipe. To be sure that the fish comes out a deep golden brown, free from the greasy appearance and taste that sometimes characterize fried foods, be sure to use a fine grade of vegetable cooking oil, the kind I use, the Martha Lee Kitchen to obtain the fishy flavor. And can be used over again, which is a wonderfully economical advantage.

Haveaddock or cod cut in pieces suitable for frying. Dip fish in milk, soaked evaporated milk. Coat each piece in dry bread crumbs or meal, and fry fish until golden white and crisp. Drain on paper with vegetable cooking oil, which is brown.

without allowing the precious coffee oils to evaporate. These oils, developing in the "roast," produce the mellow fragrance and flavor that make good coffee so satisfying.

In the White House, even the natural coffee goodness is roasted to a definite peak.

Take just enough to perfect the full coffee taste, but not enough to drive the life of the coffee out of the beans. Thus the flavor is retained in White House Coffee and not lost into the air.

If you want to serve coffee that tastes as good as fine coffee smells when it's roasted, order White House Coffee. The Flavor is Roasted In.

Time-saving meals from "left-overs"

All recipes on this page cooked in five minutes or less

MADE all the foods on this page from left-overs of meats and vegetables, deep fried in Crisco—the way the French chef does. Served with a well-seasoned sauce, these dishes will lend a French touch to your meals and at the same time help reduce your household expenses.

Put the Crisco into your cold kettle or saucepan and heat it slowly. There will be no smoke or unpleasant odor if your Crisco is heated right, as explained in each recipe. Don't wait for Crisco to smoke.

You can use the same Crisco for everything you fry—fish, meats, vegetables, even cauliflower and onions—and not one will ever taste of the other. Simply strain the Crisco back into the can after using and once in a while clear it by frying in it a few slices of raw potato.

I do not know how I could keep house without the good things to eat Crisco gives me. Cakes that you simply cannot tell from those made with butter; the tenderest, flakiest pie crusts; fluffly, golden biscuits.

An Astonishing Blindfold Test

See if this doesn't give you the greatest surprise of your whole cooking experience!

Put a little Crisco on the tip of one spoon. On the tip of another place a little of the fat you are now using; have someone blindfold you, and give you first one, then the other to taste.

Now did you ever imagine there could be such a striking difference in the taste of cooking fat? Think what an improvement Crisco's own sweetness and freshness will make in your own cakes, pies, biscuits, and fried foods.

To test your cooking fat—taste it.

Crisco's sweet flavor will astonish you.

Meat Fritters

Bits of cold left-over meat make a delicious meal for four people and it takes only a few minutes to prepare and cook them.

1 cup chopped cold meat
1 tablespoon chopped onion
1 egg, beaten
1/2 teaspoon salt
1/2 cup milk
1/2 cup bread flour

Beat egg, add milk, then flour and baking powder sifted together. Beat smooth. Add remaining ingredients. Mix well. Drop by spoonful into Crisco heated to 360° F., or when a small piece of bread browns in 60 seconds. Fry until brown and thoroughly cooked. Drain on brown paper. Serve with left-over gravy or cream sauce seasoned with a little Worcestershire sauce.

One cup left-over, mashed potato may take the place of the flour, baking powder and milk. Simply mix in order given and fry at 375-385° F., or when bread browns in 40 seconds.

1/2 cup green pepper with lamb and potatoes is delicious but you need to roll this mixture in egg and crumbs, to hold it together.

Croquettes Tropica

A delicious way to save bits of left-over chicken or other.

1/2 cup minced cooked chicken
1/2 cup minced onion
1 egg, beaten
1/2 teaspoon salt
1/2 cup milk
1/2 cup bread flour

Mix ingredients in order given. Form into shape. Roll in crumbs, then in egg, then again in crumbs. Arrange in wire basket and fry until brown in deep hot Crisco (375° F.), or when a small piece of bread browns in 20 seconds. Drain on soft paper. Serve with cream sauce.

Use the same white sauce to make croquettes from other left-overs (fish, beef, veal, combinations of vegetables). Brown as you like. Use enough sauce to hold together and follow the same method. Always use dry bread crumbs when eggs are used.

*WHITE SAUCE (for mixing): Blend

Fried Vegetable Balls

A new and delicious way to make left-over vegetables go a long way. Cooked asparagus, cabbage, peas, turnips, carrots plain or with green peas or chopped celery; uncooked green peppers. Serve with cold meat. Or serve with a cream sauce for the main luncheon dish. Prepare them any time.

Or rather than in the oven a day or two later—they will taste as fresh and delicious as when first made.

2 cups cooked vegetable, chopped
1 tablespoon Crisco
1/2 teaspoon salt
1/2 cup dry bread crumbs
1 egg, beaten

Combine ingredients and let stand 10 minutes to swell crumbs. Shape into balls. (If not stiff enough to handle add more bread crumbs.) Beat egg with 1/4 cup water until mixed. Roll balls in crumbs, then in egg and then in crumbs again. Drop in hot deep Crisco (375° F.), or when a piece of bread browns in 20 seconds, until brown. Drain on soft paper and serve.

Ham Fritters with Bananas

An unusually delicious and attractive way to serve left-over ham. Bananas are especially nice fried in deep Crisco.

1/2 cup chopped left-over ham
1/2 cup minced onion
1 egg, beaten
1/2 teaspoon salt
1/2 cup milk
1/2 cup bread flour

Beat egg, add milk, seasonings and ham, then flour. Drop by spoonful into hot Crisco (375° F.), or when a small piece of bread browns in 20 seconds, until brown. Drain on soft paper. Arrange on centre of plate and surround with bananas fried as follows:

*FRIED BANANAS—Take 6 small bananas, peel, dip in lemon juice, roll in dry bread crumbs, and fry as above until brown. Garnish with parsley.

together 4 tablespoons flour with 2 tablespoons Crisco. Heat in slowly 1 cup warm milk. Stir over fire until thick. Add 1/2 teaspoon salt.

*CHEESE SAUCE (for serving): Use 2 tablespoons flour, 1 tablespoon Crisco, 1 cup milk. Use milk or cream with grated cheese or Worcestershire sauce.

together 4 tablespoons flour with 2 tablespoons Crisco. Heat in slowly 1 cup warm milk. Stir over fire until thick. Add 1/2 teaspoon salt.

*CHEESE SAUCE (for serving): Use 2 tablespoons flour, 1 tablespoon Crisco, 1 cup milk. Use milk or cream with grated cheese or Worcestershire sauce.

The Coffee Tastes So Good Because The Flavor is Roasted In

GOOD coffee! The very thought of it, fragrant and sweet, makes one long for a steaming cup. But there are so many coffee-making failures! How can a housewife be sure of good coffee every time—coffee which really brings to the table that roasting aroma you smell round a roasting oven?

The Dwinell-Wright Company, producers and roasters of White House Coffee, have found the answer. As a result of 70 years of coffee-roasting experience, they have developed a coffee-roasting process that roasts the flavor in.

Special methods of control advance the roasting of White House Coffee.

Isadora's School Was Mecca for Parisians

(Fred Toye, of the Boston Evening American staff, was an intimate friend of Isadora Duncan for seventeen years and for seven years he directed her theatrical appearances in this country and Europe. Here is the twenty-first installment of his splendidly told story of her wonderful life.)

THE LIFE AND LOVES OF ISADORA DUNCAN By FRED TOYE. Chapter 21.

THE millionaire father of Isadora's second child, little Patrick, who had been drowned in the Seine with his half-sister, Isidore, hastened to Isadora's side when he heard of the Viareggio affair and the extremes to which Isadora's determination to have her children back had led her.

He went with her over the cruelty of fate, and experienced all the thrills which a novice who enjoys being alone, can get out of a bizarre situation. Sister Elizabeth became Isadora's health and mental well-being. She decided, with Augustus Duncan, that at all costs, Isadora must be made to occupy herself with some task which would keep her mind busy.

The brother and sister urged Isadora to resume music with her school, and to this end, Elizabeth offered to bring back to Isadora seven of the remaining girls of the class last twenty. Elizabeth would keep her own part in the school, which who had taken on too much weight to permit her to dance, and who made an excellent teacher for the young pupils of the school.

Isadora's own plan, on his part, had a practical suggestion to make. Recently he had purchased a beautiful chateau at Moulon, near Saint Cloud, which he had planned to transform into a hospital. His plans had miscarried because a rift with the wife of a surgeon who was to be made chief of the hospital. Isadora owned a valuable piece of property on the rue de Berri, off the Champs Elysees in Paris. Just across the street from the American church.

HER NEW SCHOOL

It was his suggestion that they should make an even exchange of their properties, thus giving Isadora a house for her new school. The transaction was accomplished, and Isadora found herself mistress of a magnificent establishment of suitable proportions, furnished in gorgeous manner. It later developed that Isadora had handed over an unencumbered piece of valuable city property for an estate upon which there existed a mortgage to the amount of nearly one hundred thousand dollars.

The Paris property had been purchased with a view of constructing a theatre upon the site, and it came the production which Isadora dreamed of combining the arts of music, drama and the dance. The period which Isadora spent at Bellevue-Moulon was perhaps the most inspiring in her career. Bravely she set out to augment her school, holding sessions in Paris every week for the purpose of selecting young children to be taken to Bellevue and he given the long course of instruction which her art demanded.

A group of nearly forty youngsters, ranging from five to ten years of age, was finally selected. Everything was given them free, even to the clothes which they wore, changing little outfits of Isadora's own design, all uniform as to color but varying as to color, each child having her own cut. Governesses, teachers and nurses were engaged.

A large staff of maids, two cooks, an engineer, gardener, chauffeur, housekeeper and female secretary, Isadora's personal maid, her manager, her brother and his wife.

A MECCA FOR ALL

Abolition of League May Kill Hockey in Schools

'MORNING GLORIES' DISBANDED

Hub Schools to Have Teams, but No Championship Will Be Awarded

By JOE CASHMAN.

Another body blow has been delivered in the Boston Public Schools to athletics.

The famous "Morning Glories" hockey team, which for years has been the pride of the city, will be disbanded this winter.

There will be no hockey team in the city this winter, but the school authorities are planning to have a hockey team in the city next winter.

Unless we miss our guess, the result will be just the opposite, in that the school authorities will be able to put the hockey team in the city next winter.

Of course, we may be all wrong. We hope so, because next event proves that if we are right, the school authorities will be able to put the hockey team in the city next winter.

MASS ATHLETICS FAIR.

The idea of mass athletics is all very fine, but it is not the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

STADIUM ACTION PICTURE WHICH BRINGS OUT HARVARD WEAKNESS

HOW HARVARD FAILED TO BREAK UP PURDUE ATTACK.

Joe Crosby, Harvard fullback, is shown tackling Ralph Welch. Whereas Lord, No. 3, Harvard right end, should have broken through and tackled Welch behind the line of scrimmage, Welch has gone beyond the Harvard line. Lord was sucked in and is out of the play, being three yards behind Welch when Crosby reached the big Texan. Captain Pratt, No. 51, was put out of the play by Guy Hutton, No. 75, the Purdue end, and has just arisen from the ground. Hep Strong, No. 46, can be seen coming around behind the Purdue line. Note that Crosby did not get a clean shot at Welch, due to the hip action of the Purdue man.

PUMP BREATH INTO PLAYER

The idea of mass athletics is all very fine, but it is not the idea of mass athletics that is the problem. It is the idea of mass athletics that is the problem, and it is the idea of mass athletics that is the problem.

Eagles in Fine Shape for Bo's Geneva Team

The Eagles are ready. With every member of the first and second teams in perfect condition, the Boston College eleven should have its full strength available Wednesday afternoon when it faces the Geneva College team, winners of the Tri-State Interscholastic Conference championship for the past two seasons.

ROYAL WELCOME FOR PURDUE

Lafayette, Ind., Oct. 10 (AP).—Thousands of wildly cheering townspeople and Purdue fans were waiting for the Purdue football team as they arrived in Lafayette today for the game with the Boston College team.

Temple of Mystery Is Ready for Dartmouth

Philadelphia, Oct. 10.—Temple University, with best football team in its history, is eagerly looking forward to its game with Dartmouth at Hanover next Saturday. This is the hardest contest any Temple team has ever faced and will also be the longest trip any Temple team has ever made.

Miss Gleitz's Channel Swim Unrecognized

London, Oct. 10 (AP).—Miss Gleitz's channel swim, which she completed in 10 hours and 15 minutes, was not recognized by the British Amateur Swimming Association.

Pirate Players Get \$3,994 Each

Pittsburgh, Oct. 10 (AP).—Each of the 1928 members of the Pirates received \$3,994 each in a check from the Pirates Association.

Nick Flatley Convicted as Baseball Expert

No matter how hard he tries, Nick Flatley, sports editor of the Boston Evening American, cannot deny that he is a baseball expert. That you may know how expert Nick really is, we quote a little history.

PIRATES ARE REPORTED SOLD

Continued from First Page. The Pirates are reported to have been sold to a group of investors.

NAVY FACES NOTRE DAME

Rockne's Eleven Comes East for Game on Saturday; Yale Plays Brown

New York, Oct. 10 (A.P.)—Notre Dame is coming East this week to put on exhibition another of its famous Rockne-coached football elevens, and the Indians, pitted against the Navy at Baltimore, have been accorded the star place on a schedule that brings to poster several top-notch organizations.

Notre Dame, which has won four consecutive national championships, will play Yale at New Haven on Saturday, Oct. 15, and Brown at Providence on Sunday, Oct. 16. The Indians will play Navy at Baltimore on Saturday, Oct. 15.

Yale plays "Iron Men" Army on Oct. 17, and Brown on Oct. 18.

Notre Dame's record this year is 10-0-1, and it is the only team in the country that has won all its games. The Indians have a record of 7-2-1.

Notre Dame's coach, Knute Rockne, is one of the best in the country. He has won four national championships and is considered one of the greatest coaches in the history of the game.

Notre Dame's players are all from the Midwest and are known for their hard work and determination. They are expected to be a tough team to beat.

Notre Dame's schedule is one of the toughest in the country. They will play Yale, Brown, and Navy, all of which are top-notch teams.

Mr. Boston freed this question at the gang in the sport department today.

"I answer it for you, boys," went on the veteran. "A billion dollars."

"That's a lot of money," said one of the boys. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said another boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said a third boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said a fourth boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said a fifth boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said a sixth boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said a seventh boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said an eighth boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said a ninth boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said a tenth boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said an eleventh boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said a twelfth boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said a thirteenth boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

"That's a lot of money," said a fourteenth boy. "But I've been known to see Babe Ruth for a long time. I've seen him in the park. I've seen him in the street. I've seen him in the hotel. I've seen him in the car. I've seen him in the train. I've seen him in the plane. I've seen him in the ship. I've seen him in the boat. I've seen him in the house. I've seen him in the garden. I've seen him in the field. I've seen him in the woods. I've seen him in the mountains. I've seen him in the valleys. I've seen him in the rivers. I've seen him in the lakes. I've seen him in the oceans. I've seen him in the sky. I've seen him in the earth. I've seen him in the sun. I've seen him in the moon. I've seen him in the stars. I've seen him in the planets. I've seen him in the galaxies. I've seen him in the universe. I've seen him in everything."

Sacco Will Force the Fight With Finnegan

Whether Boston is to see a local replica of the famous Gans Dorchester and Jimmy Sacco of East Boston clash the coming Friday night for the Argonne A. A. in the Mechanics Building depends on that event to settle for itself.

All the signs, however, will be against the boys, and, for the boys, a time will hinge on the result.

The boys are expected to be a tough team to beat. They are very strong and fast. They are expected to be a tough team to beat.

Stretching Exercise Will Make the Body More Supple

By Maria Jeritza

Prima Donna of the Metropolitan Opera Company, One of the Most Beautiful Women of the Day.

HAVE you ever noticed how fit and well many of the world's athletes in the "Zoo look" yet their cramped quarters preclude the limited exercise in which they were accustomed before captivity.

If you watch closely you will note that the tiger or the lion stretches all its sinews length from time to time lazily without moving from its place. An immense strain is thus relieved.

A woman confined to her bed many hours each day or for any reason unable to get as much active exercise as she would like may well follow the example of the animal and take active exercise by means of stretching.

Of course you will object that stretching is not from "the Zoo," but when it is observed in the animal world, it is a natural action which you can take at your desk or even in a crowded street.

Stretching exercises, which almost every day, are so unobtainable. These exercises will give a stretch to nearly all the large muscles of the body, improve your circulation and tend to take limber and supple to your joints.

Seated at your desk, your back and spine straight, your feet on the ground, your legs pointed about, tense your legs, then relax them ten times, giving them as

good a stretch as you possibly can. Next tense, then relax your ankles in the same way ten times. You will find that you can flex nearly all the parts of your body, even your jaw and eyes, in this way.

It is well to give special attention to flexing the abdominal muscles. These muscles play an important part in holding the body together and they are always being stretched and relaxed. It is a good idea to know a healthy muscle is never fit.

When you tense your abdominal muscles, draw them in, hold them for a half a minute, then try to draw them out. You will find that in an up and down movement, you will keep the blood circulating through them and add to their suppleness.

There are countless stretching exercises which tend to limber and supple the body, adding grace to the movements. These I have suggested as a starting point for your stretching exercises.

Stretching exercises, which almost every day, are so unobtainable. These exercises will give a stretch to nearly all the large muscles of the body, improve your circulation and tend to take limber and supple to your joints.

Seated at your desk, your back and spine straight, your feet on the ground, your legs pointed about, tense your legs, then relax them ten times, giving them as

Monotony in the Office

LIFE OF THOMAS A. EDISON

(Authorized by Mr. Edison) Text by Arthur J. Palmer Drawings by Frank Kuchmeister

The photograph, electric light, motion pictures and the telephone are familiar to all of us. They overshadow the many other Edison inventions, amazing in number and variety. Reverting with a friend's achievements, Edison remarked: "Say, I have been mixed up in a whole lot of things, haven't I?"

Monotony and Work in the Business World

By Chas. A. L. Reed, M. D., Former President of the American Medical Association.

DID you ever have a task, especially a regular job, that you had to stick to until you just hated it? The same thing, over and over again, day in and day out, simply exhausts the spirit of the doer and machinery by which it is done. It gives no wholesome exercise by which other parts of that same machine may be become developed and strengthened.

Medical advisors recognize the intimate relation between monotony of work and inefficiency. They advise their respective companies accordingly.

Any method of reducing the uniformity of work is a step in the

right direction, so long as the balance is kept between too much change, which irritates piece-work, and too little, which causes monotony. Any method of increasing the interest of or providing an incentive to work will have a good effect.

Boredom is very serious if the worker feels that the work is worth doing. The factor that makes the work doing may be anything from a high wage to a young man in the same factory, pride in the organization, pride in one's own skill or a personal liking for one's colleagues.

If the factory atmosphere is good, conditions will be tolerable, which in a bad atmosphere would produce constant complaint.

Short talks on the relation of each worker and his position to the general scheme may increase the

interest in the work, and a chance over to piece-work will give an interest in output.

Rest pauses and changes of work, giving the worker something to look forward to, incite him to continue for the time being. Change of work, if possible, is better than rest, for it gives a complete break away from the attitude that has become wearisome.

It may be possible to arrange to collect various subsidiary operations, such as fetching or removing work, into one period instead of allowing them to be performed

sporadically. For example, in a certain industry in England (British Medical Journal), a group of girls had to sew, pack, check and mark the contents and return. The room was

very congested and untidy. The workers had to go to the store shelves for each parcel.

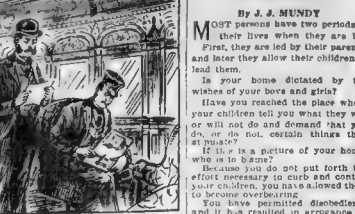

The psychological expert who took this room in hand specialized the work still further, arranging that one team of girls opened, another team inspected and a third did the marking. The most important change, however, was that the three teams changed functions at intervals.

Although each job involved more repetition than the whole circle did before, three jobs done for an hour each were permanently more interesting. The environment was improved. The room became tidier.

The 10 per cent increase in output permitted a number of workers to be moved to other jobs. This relieved the congestion. There was

Rainfall Destroys Forage

EXCESSIVE rainfall and high waters have destroyed the forage of a moose herd on Isle Royale, in Lake Superior. Because of the lack of food, conservationists fear that the herd will be driven from the island.

In 1886 Edison made experiments with wireless telegraphy on moving trains. He put his system into practical use on the English Valley Railroad. The wireless waves passed from a piece of metal on top of the car to the regular telegraph wires, thence to the dispatcher's office.

Who Rules Home?

By J. J. MUNDY

MOST persons have two periods in their lives when they are led. First, they are led by their parents and later they allow their children to lead them.

In your home dictated by the wishes of your boys and girls? Have you reached the place where your children tell you what they will do, or will not do and demand that you do, or do not, certain things that

it is a picture of your home, who is to rule?

Because you do not put forth the effort necessary to curb and control your children, you have allowed them to become overbearing. You have permitted disobedience and it has resulted in arrogance on their part.

It may be a little late for you to assert yourself on their behalf, but it is better to start while they are living in your home.

Permitting them to lead you will do more harm to your mind, and may result harmfully to both you and your children.

Three-Minute Trips

By TEMPLE MANNING

THE black mask is not always a sign of evil. It does not always

hike the face of the burglar or the hangman. It may be the means of concealment of the identity of the kindest men in the world.

Fluence and many other Italian cities have a secret order of men who are pledged to "Do Good by Stealth." The league is non-partisan, non-sectarian, and no one who wishes sincerely to belong is refused membership. King and peasant alike may belong.

If you walk through the streets of almost any Italian city then do not be terrified if you should see a sin-bonneting figure, robed in heavy black, his head covered with a long black hood. But know that he is a member of the Misericordia, or the Brothers of Mercy, serving his day of service to others.

As long ago as the thirteenth century this society was formed in Florence, and the idea became so universal that many branches were organized in most of the larger cities of Italy. Today many of the most men of Italy are reported to be members, including King and Mussolini, although a roll of the society has never been made public.

But as the members are always clad in the rough black coat and hood the crowd never knows who aided him, but may always expect a comforting thought that someone has been benevolent to a fellow human.

And all this is achieved so many eyes are of the town. It is a quiet, unobtrusive, and effective way of doing good, and functions in the manner of the Red Cross.

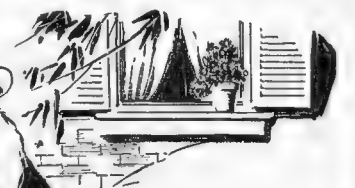

A HEALTH SECRET

Wine Elair Tonic is one of the most efficient, most complete and best all-around tonic known today. Its reputation has been constantly increasing. Physicians prescribe it regularly when a reliable tonic is needed.

Correct Manners Explained

By MRS. CORNELIUS BECKMAN

DEAR MRS. BECKMAN:

We are extremely fond of corn on the cob, but like every one else, and our difficulties in eating it "prettily." Please give me some tips on how to eat it.

And all this is achieved so many eyes are of the town. It is a quiet, unobtrusive, and effective way of doing good, and functions in the manner of the Red Cross.

if you like coffee richly creamed

use Standard SWEETENED CONDENSED Milk

It creams and sugars... deliciously at half the cost of separate cream and sugar!... And it keeps for days after the can is opened even without ice!

Standard SWEETENED CONDENSED Milk

See page 11

the house," the children and I. C. THANK you heartily for giving me a plan in the family corn. And I'm glad especially to come in on the delicious part of turn on the cob. I got it when it could not wait and I was all over again in some more convenient

form, don't you? However, in spite of small silver skewers and other inventions that kindly intended inventors have devised to help us in holding the awkward cobs, corn on the cob is still listed as a finger food.

What usually happens is I am a bit of a corn aficionado. I am a bit of a corn aficionado. I am a bit of a corn aficionado.

The English food writer on corn on the cob in short lists, "It is a great food and I always have it on the table when I eat it."

You can rest assured that when I eat corn on the cob it is served with butter, salt and pepper—it is on the table as an accompaniment to a "latter" and more convenient to eat.

But, no matter whether the corn on the cob is served as a separate course or with the main course, the best should have a finger-bowl placed with the corn on the cob. In fact, a finger-bowl should always be placed with food—most, and corn is no exception. It may be touched by the fingers. The finger-bowl is placed on the left of the place. When corn on the cob is served, of course, a bread and butter plate is placed, too, on the left of the place, over the top of the fork. Therefore, the finger-bowl would be placed below it, but still on the left.

FRISKY CALM IN HIS
MOMENT OF TRIUMPH

Disguise used by Mr. Frisky in tracking down story of the ages.

WASHINGTON, D. C.—Well, this is a Red Letter Day, if I do say so myself.

Who would ever have dreamed, on this fine yesterday, that I, Mr. Frisky, a comparative newcomer, was talking on the precipice of such a colossal story—a discovery that will thunder down the corridors of time and leave the name "Frisky" reverberating in the minds of school children for generations on generations!

And yet, in my moment of triumph, I seem to be my old self—calm, modest, firm yet quietly tolerant with men and all.

And what is this journalistic feat—this reward of a lifetime of toil, patience and industry?

I have discovered the man who knew Lincoln! It was at my academy. I first noticed an item about it in the local paper. His name is "Chuck," and he is a 44-year-old Illinois boy. Further than that I am out at liberty to divulge.

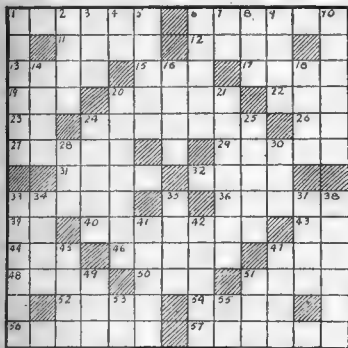

I like to call on Frisky Wolf, Her paw is blue! Her paw is blue!

Up and frumigate all morning with scratch hook around yeggs and

THE BOSTON AMERICAN'S PLATFORM FOR BOSTON AND NEW ENGLAND

For BOSTON: 1—Clean streets.
2—Better pay for honest public service.
3—An airport **SECOND TO NONE**.
4—Erection of a **MUNICIPAL AUDITORIUM** to compare with any in the land.
5—In order that Boston, properly supplied with first-class hotels, may be the premier convention city of the U. S. A.

For NEW ENGLAND: 1—Weld the six States into a unit through the activities of the **one** England Council, thus creating a community consciousness.
2—Promote intercourse with Central and South America, encouraging New Englanders to "turn to the sea" again.

3—Keeping everlastingly at the job of telling the rest of the country all about our unique advantages as **Summer and Winter Playground of the Nation**.
4—Foster the prosperity of our industries through (1) greater efficiency in production and (2) the use of modern methods in merchandising.
5—Promote in every way such natural resources as forests, water powers and fisheries.
6—Assist New England agriculture to better marketing methods.

Is New England Stingy?

Two Reflections Upon a Subject of Endless Interest

Citizens who have just paid their taxes, who are about to pay their taxes, who have to pay their taxes, who are "all ways" paying taxes, and who have come to detest the word, will be glad to have brought to their attention two deliverances on the subject which have been made within the week by gentlemen who approach it from different angles.

The first speaker is Mr. William Roger Greeley, addressing the fourteenth annual conference of the Massachusetts Federation of Planning Boards, at the Hotel Walden in Greenfield:

"Our history is against us. It explains why the principal effort in a New England community 'has been to KEEP DOWN TAXES, to hold the rate 10 or 15 below where it should be—cripple schools, let highways go to wreck and ruin, leave the feeble-minded and criminal at large and generally sacrifice the greatest and most brilliant possibilities of a wealthy and luxurious society to bums, bores regarding rates of taxation as expressed in dollars and thousands of real estate valuation."

"What is it in our history that has made us the victim of this obsession?"

"In a word, we, the wealthy people that history has ever known, want to keep on hoarding up money in the midst of ignorance and neglect, of filth, inactivity, lust and corruption, or do we wish to use our money in such a way, guided by such foresight, that we shall find ourselves living in the midst of beauty, wisdom, culture and happiness, with a prospect of health and sanity for our children and grandchildren? That is the city planner's question to Massachusetts communities."

Enjoy the picture for a minute or two and then consider what the Honorable Albert H. Hunt, of Nashua, has to say. Mr. Hunt is a member of the New Hampshire Governor's Council. HE addresses himself to the Recess Tax Commission of that State, as follows:

"I do not recall ever having noticed a DECREASE in taxes. On the contrary, I have watched with misgiving a steady increase. It seems to me the total amount of taxes must have more than doubled in the past ten years."

"During recent years, the question in my mind has been when this continual increase would stop. It ought to stop now."

"Present revenues, wisely spent, are more than adequate for all public requirements. The people cannot afford to spend more money through the vertiginous units of government than they are spending now. It is my considered opinion that under the present circumstances

We like very much Mr. Greeley's picture of that imaginary town "where citizens feel themselves stockholders in a corporation, not to manufacture suspenders or talcum powder, but to make happy, useful citizens. The directors will plan carefully what is required for a proper 'plant' to perform this great work. They will have the best schools with the best teachers—no talk of cutting here. They will build the necessary roads and build them well. Furthermore, they will build them at once, as they are to be used at once. And so on!"

But as a practical man, Councillor Hunt, of Nashua, wants to know "where the money is coming from."

And if we were about to run for office—well, in New Hampshire, anyhow—we believe we would get further on the Hunt platform.

At least at just this time.

Paving Blocks

"Discovered" in New York They Lead to Results in Belfast, Maine

The requirements of one of the public utilities of New York City not long ago called for the digging up of a street in one of the older business sections.

The contractor who did the work was amazed to discover the excellent condition of granite paving blocks, put down there more than 40 years ago.

Telling no one what was in his mind the contractor began to ask questions and as one of the results of his inquiries an industry which had been believed to be almost dead and gone has been brought back to life in the neighborhood of Belfast, Maine.

The New York paving blocks, the contractor learned, came from the Oak Hill quarries in Waldo County, which ceased operations in 1890.

After lying idle all these years the hammers are ringing, the most up-to-date machinery has been installed and a crew of workmen has been brought to the district so large that a 45-room boarding house has been built for them.

The output is 45,000 granite blocks a week. All are being shipped to New Jersey, where a 13-mile boulevard is being built at a cost of \$400,000.

The quarriesmen who have been brought in are Scotch, Irish, Swedes and English. They work an eight-hour day for a wage described as "high in comparison with local labor prices." The Scots and the Irish among them should feel at home in the neighborhood of Belfast, which was settled by pioneers from the North of Ireland just before the Revolution, incorporated in 1773 and named after the Belfast "at home."

"This new industry," we read, "means much to Belfast, as its payroll is large and while it is some miles from the city much of the money will go into circulation here."

All well and good, but—the question suggests itself naturally—how many more dead quays are there in New England, in vainly forgotten, anemic industries, waiting to be rediscovered by smart and wide-awake gentlemen the other side of Connecticut?

Fire Prevention Week

LAWMAKERS AND WET-DRY ISSUE

By DR. FRANK CRANE

SENATOR GLASS stopped the argument recently between Mr. McAdoo and Mr. Ritchie as they were discussing Prohibition by the remark:

"Anyone is a fool who thinks that the Eighteenth Amendment will be repealed in the next 100 years. What has Prohibition got to do with the Presidential election anyway? Let those Democrats who want to agitate for a modification of the Volstead Act do it by voting for wet Congressmen. Congress, not the President, must vote on any such modification."

Criticism has often been passed upon the two great parties because they have not made the wet and dry campaign an issue. It has no business being an issue. We are a dry country, supposedly, because Congress has voted it and the Legislatures of the States have ratified it.

We continue to be a quasi-dry country because there are more dry Congressmen than wet.

It was a clever move when the Prohibitionists quit having a national party and concentrated their efforts upon electing dry Congressmen. It will be a mistake whenever they quit that method.

This is a free country. Elect enough wet Congressmen and get enough wet Legislatures and you can repeal the Volstead law or the Constitutional Amendment any time you want to.

This is a representative Government. The will of the people is determining by the kind of people they elect to office to make their laws. Just elect a different kind of people and select wet instead of drys and you can change things soon.

Every effort to defeat the Prohibition Amendment by some other method than this is contrary to our scheme of government.

No matter how much individual localities may fret and fume, the Prohibition Amendment is going to stay on the statute books as long as the duly selected law-makers choose it to stay. If you want that amendment taken off the statute books, elect a different kind of law-makers. That is the gist of the whole matter.

(Copyright, McClure Newspaper Syndicate.)

THE RHYMING OPTIMIST

BY ALAN MICHAELS
YOUR friend can help with kindly cheer and gentle words of praise to bring your heart's desire near, to brighten all your days. For any task you undertake your friend has loving eyes, he knows the effort which you make, your struggles he will prize. And so, through trials and through tears, through hopes and fears, your friend will be your guide, your friend will be your guide.

LISTEN, WORLD!

By ELSIE ROBINSON

HAS Love failed you? Has human Love tricked you and God's love left you comfortless in your dark hours? Have you grown bitter, thinking that there was no truth or justice in life? I have—often. But perhaps that is because you and I have looked at love in the wrong way.

Look at love in such a small way. We think of it as something to make us happy, or excited, something to heat us like a medicine and warm us like a blanket. We want to hold it like money. Then, when it slips through our fingers or falls to the ground, we cry that Love has failed us.

Love has not failed us. But our conception of Love has failed us. If we think of Love in that way it will fail us. But there is another way of thinking about Love which will never fail us.

Try to think of Love as you think of Life. Not as a personal episode but as a great movement in which you may take a part. You do not demand that Life shall be fitted to your measure. You know that you must try to fit yourself to Life. You know that you must GO with Life, and GROVE with Life, if you wish to get anything out of it.

And the same thing is true of Love. For Love is just Life warm current flowing through your heart and for Love is just Life warm stream of Life. You cannot cut Love out of Life. You must take Life as it comes, and Love will never fail you. Those who love may die, or betray you, or leave you indifferent to you. But Love itself will not betray you. It will carry you on and it will always be worth anything you may have to suffer for it.

So we should move with it as we move with a tide—not whimpering because we cannot see the goal or direct the current, but giving ourselves up to it in a sweep—and pursuing it with the strength and stivity and beauty.

If you will take Love that way it will never fail you. Those who love may die, or betray you, or leave you indifferent to you. But Love itself will not betray you. It will carry you on and it will always be worth anything you may have to suffer for it.

Many men of genius must appear before a particular man of genius can appear.—Bacon
Wisdom does not show itself so much in present as in life—firmness of mind mastery of appetite.—Seneca
There is nothing so easy in itself but grows difficult when it is performed against one's will.—Terence
Know this, that every country can produce good men.—Lactantius

TRYING TO GRASP IDEA OF SPACE

By GARRETT P. SERVIS,

Noted Astronomer and Writer on Scientific Subjects of Popular Interest

"Please, write an article on Space. If Space is a million miles deep, and trouble this a few million times does Space still go on—James McDean."

In mathematics we find the idea of limit which can always be approached but is never attained. That is "infinity." In some of their operations mathematicians deal with various orders of infinity, as if there could be a little infinity, a big infinity and infinite infinity. Also, in mathematics, infinity both swells and contracts—i. e., there is infinite greatness and infinite littleness.

"We all grow," says infinity; "I can keep that up endlessly. When my head hits the highest star I shall have only just begun."

"But, see me shrink," also says infinity. "I can keep going that way, too, forever. When I am as small as an electron I have only begun to get little. When I choose the electron can be greater than the universe to me, and also when I choose the universe can be to me smaller than an electron."

These ideas of large and small, and of larger and smaller, are devices by means of which man's mind tries to grasp indirectly what it cannot conceive directly. The ideas

apply to both space and time. Eternity is the analogue of infinity. Time may be infinitely long or infinitely short. I have never met anyone who said he could form a clear conception of either a beginning or an end of either time or space. The constitution of the mind is such that as soon as the idea of beginning or ending is presented to it becomes aware of a background consisting of "before" or "after."

In the case of things that are capable of changing their form or constitution there is no difficulty here, but we can only conceive of space and time as invariable in their nature and form consequently to satisfy the inherent tendency of the mind to reject the idea of absolute annihilation we think of space and time as having neither beginning nor end.

The Einsteinians do not make the matter any clearer by juggling with mathematics and speculative philosophy until they produce a mental monster which they name "Space Time." But there is a clear though the labyrinth that serves perfectly well for all who are content to acknowledge that, though we understand well the part played by space and time in our world and life, we are not intellectually capable of grasping fully their essential nature. See from our limited experience.

What Do You Know?

BOSTON'S ORIGINAL KNOWLEDGE TEST

Do you know?

1. What name was given to the extreme anti-slavery party in the United States in 1857?
2. What was the purpose of the Crusades?
3. What is the name of the expression "vice versa"?
4. What does the abbreviation I. W. W. stand for?
5. What is a "dark horse"?
6. What nut comes from oak trees?

Match correctly:
1. Jacob Estlin. Historian.
2. Clarence Dane. Sculptor.
3. Jack Delaney. Baseball player.
4. Vincent Lopez. Novelist.
5. Rebecca West. Pugnacious.
6. Edward Gibbon. Dramatist.

Fill each blank:
1. Butter is the product of _____.
2. The larva of a moth or butterfly is the _____.
3. The Fourth Estate is _____.
4. B.B. is an abbreviation for _____.
5. Embonpoint means _____.
6. Butter is the product of _____.
7. The larva of a moth or butterfly is the _____.
8. The Fourth Estate is _____.
9. B.B. is an abbreviation for _____.
10. Embonpoint means _____.
11. Butter is the product of _____.
12. The larva of a moth or butterfly is the _____.
13. The Fourth Estate is _____.
14. B.B. is an abbreviation for _____.
15. Embonpoint means _____.
16. Butter is the product of _____.
17. The larva of a moth or butterfly is the _____.
18. The Fourth Estate is _____.
19. B.B. is an abbreviation for _____.
20. Embonpoint means _____.
21. Butter is the product of _____.
22. The larva of a moth or butterfly is the _____.
23. The Fourth Estate is _____.
24. B.B. is an abbreviation for _____.
25. Embonpoint means _____.
26. Butter is the product of _____.
27. The larva of a moth or butterfly is the _____.
28. The Fourth Estate is _____.
29. B.B. is an abbreviation for _____.
30. Embonpoint means _____.
31. Butter is the product of _____.
32. The larva of a moth or butterfly is the _____.
33. The Fourth Estate is _____.
34. B.B. is an abbreviation for _____.
35. Embonpoint means _____.
36. Butter is the product of _____.
37. The larva of a moth or butterfly is the _____.
38. The Fourth Estate is _____.
39. B.B. is an abbreviation for _____.
40. Embonpoint means _____.
41. Butter is the product of _____.
42. The larva of a moth or butterfly is the _____.
43. The Fourth Estate is _____.
44. B.B. is an abbreviation for _____.
45. Embonpoint means _____.
46. Butter is the product of _____.
47. The larva of a moth or butterfly is the _____.
48. The Fourth Estate is _____.
49. B.B. is an abbreviation for _____.
50. Embonpoint means _____.
51. Butter is the product of _____.
52. The larva of a moth or butterfly is the _____.
53. The Fourth Estate is _____.
54. B.B. is an abbreviation for _____.
55. Embonpoint means _____.
56. Butter is the product of _____.
57. The larva of a moth or butterfly is the _____.
58. The Fourth Estate is _____.
59. B.B. is an abbreviation for _____.
60. Embonpoint means _____.
61. Butter is the product of _____.
62. The larva of a moth or butterfly is the _____.
63. The Fourth Estate is _____.
64. B.B. is an abbreviation for _____.
65. Embonpoint means _____.
66. Butter is the product of _____.
67. The larva of a moth or butterfly is the _____.
68. The Fourth Estate is _____.
69. B.B. is an abbreviation for _____.
70. Embonpoint means _____.
71. Butter is the product of _____.
72. The larva of a moth or butterfly is the _____.
73. The Fourth Estate is _____.
74. B.B. is an abbreviation for _____.
75. Embonpoint means _____.
76. Butter is the product of _____.
77. The larva of a moth or butterfly is the _____.
78. The Fourth Estate is _____.
79. B.B. is an abbreviation for _____.
80. Embonpoint means _____.
81. Butter is the product of _____.
82. The larva of a moth or butterfly is the _____.
83. The Fourth Estate is _____.
84. B.B. is an abbreviation for _____.
85. Embonpoint means _____.
86. Butter is the product of _____.
87. The larva of a moth or butterfly is the _____.
88. The Fourth Estate is _____.
89. B.B. is an abbreviation for _____.
90. Embonpoint means _____.
91. Butter is the product of _____.
92. The larva of a moth or butterfly is the _____.
93. The Fourth Estate is _____.
94. B.B. is an abbreviation for _____.
95. Embonpoint means _____.
96. Butter is the product of _____.
97. The larva of a moth or butterfly is the _____.
98. The Fourth Estate is _____.
99. B.B. is an abbreviation for _____.
100. Embonpoint means _____.
101. Butter is the product of _____.
102. The larva of a moth or butterfly is the _____.
103. The Fourth Estate is _____.
104. B.B. is an abbreviation for _____.
105. Embonpoint means _____.
106. Butter is the product of _____.
107. The larva of a moth or butterfly is the _____.
